

Interstitial Lung Diseases and beyond: boundaries, gaps, and interdisciplinary case discussions

INTRO

5'

Chairs

Part 1: Rare lung diseases remain rare: obstructive and restrictive cases

CHAIR: Prof. John-David Aubert

Alpha 1-Anti-Trypsin-Deficiency: the devil in between lung and liver?

PD Pavel Strnad
(RWTH D)

15'

HEP

- Discussion

5'

Pulmonary-Arterial-Hypertension: the devil in between lung and heart?

PD Frédéric Lador
(HUG)

15'

PUL

- Discussion

5'

Long-Covid-Perspective: how do patients with rare respiratory disease behave?

Prof. Rembert
(Schön Klinik D)

15'

REHA

- Discussion

5'

Part 2: Interstitial lung diseases progression: a surprising intend or no intend

CHAIR: Prof. Ulrich Walker

Spectrum of progressive pulmonary fibrosis: can the new Guidelines support us?

PD Karin Hostettler
(USB)

15'

PUL

- Discussion

5'

Detect a fast progression: insights into an Artificial Intelligence-Based Evaluation

Prof. Thomas Frauenfelder
(USZ)

15'

RAD

- Discussion

5'

Antisynthetase syndrome: treatment and outcome

Prof. Jörg Seebach
(HUG)

15'

- Discussion

5'
